
Cone
Tangent ogive
Parabolic
Power $n = \frac{1}{2}$
Power $n = \frac{3}{4}$
LV-Haack
Von Kármán
(a)
Δz_{apogee} vs. baseline [m]
fineness L/D
(b)
full 3U length
length with $r \geq 77$ mm [mm]
fineness L/D
(c)
Δ static margin [cal]
fineness L/D
